FEATURES & BENEFITS

- Halo Safety Wing is the final protocol or intervention for a patient or resident who develops some type of cognitive, mental, or physical behavior problem that prevents them from understanding what they are doing in their bed system.
- Used if patient or resident no longer can be trusted to make safe and consistent decisions regarding their bed systems sleeping environment.
- The Halo Safety Wing is the final intervention that eliminates the four most dangerous entrapment zones.
- The Halo Safety Wing is substituted for the Halo Safety Ring, creating a safe bed system environment for residents.
- The Halo Safety Wing has been independently tested and passes the bed system measurement device test for all four critical zones of bed entrapment.
- Exceeds the compressibility of mattress and 2 1/3" gap space along with the 60" exit point for Zones 2, 3, and 4.
- Meets and exceeds the Hospital Bed System Workgroup report alternative dimensions and assessment guidelines provided along with the FDA.
- Lifetime Warranty.
