* 77101 has been discontinued and replaced by 77301
* 77102 has been discontinued and replaced by 77302

IMPROVEMENTS & UPDATES

The new Halo assembly fits on more beds including all of the Joerns Easy Care Line and Invacare CS Line.

New assembly replaces 77113 and 77203 that were unable to articulate with the bed frame.

Both the 77301 and 77302 come with 2 ring mount brackets and able to mount on either side of the bed for single assemblies.
New assembly hardware includes center bar with mounting holes, screws, and 2 Allen wrenches.

Initial adjustments are based on the bed width and can be done prior to installing on frame using 1 Allen wrench.

Final adjustments are done at each side of the bed frame using 1 Allen wrench.

Also includes cone tip screws that vertically lock into the bed frame to help stabilize and secure the Halo assembly.

The new assembly has improved strength and durability.
